Attorney Docket No.: JHU1660-2

**PATENT** 

## B. In the Claims

Please cancel claims 1 to 75 and 84 to 85 without prejudice. Please amend Claim 83.

Upon entry of the present amendment, the status of the claims will be as follows:

Claims 1-75 (canceled).

- 76. (previously presented) A kit useful for the detection of a methylated CpG-containing nucleic acid in a GSTP1 promoter comprising carrier means containing one or more containers comprising a first container containing a reagent which modifies unmethylated cytosine and a second container containing primers for amplification of the CpG-containing nucleic acid, wherein the primers distinguish between modified methylated and nonmethylated nucleic acid.
- 77. (previously presented) The kit of claim 76, wherein the modifying regent is bisulfite.
- 78. (previously presented) The kit of claim 76, wherein said reagent modifies cytosine to uracil.
- 79. (previously presented) The kit of claim 76, wherein the primer hybridizes with a target polynucleotide sequence having the sequence from about -539 to -239 upstream from GSTP1 transcription start site.
- 80. (previously presented) The kit of claim 79, wherein the primers are SEQ ID Nos: 1, 2, 7, 8, 9, 10, 11, 12, or 13 or any combination thereof.

81. (previously presented) The kit of claim 76, further comprising nucleic acid amplification buffer.

**PATENT** 

Attorney Docket No.: JHU1660-2

- 82. (previously presented) Isolated oligonucleotide primer(s) for detection of a methylated CpG-containing nucleic acid wherein the primer hybridizes with a target polynucleotide sequence having the sequence in the region from about -539 to -239 upstream from GSTP1 transcription start site.
- 83. (currently amended) The primers of claim 81, wherein the primers <u>are SEQ ID</u> Nos: 1, 2, 7, 8, 9, 10, 11, 12, or 13 or any combination thereof.

Claims 84-85 (canceled).
